www.newlevelmotorsports.com

NEW LEVEL MOTORSPORTS is your premier source for wholesale performance parts and accessories. Over 75% of the business that we engage in at New Level Motorsports is at the wholesale level.

We aren't your typical warehouse distributor. First, we are a factory direct authorized distributor for every line that we carry. This allows for lower prices, better fill rates, and superior customer service. We get the new products first, and we get the new and important information before it trickles down to the indirect wholesalers. Each time we answer your call, you'll be speaking with a knowledgeable representative who is familiar with each and every single product line that we have available. Our customer service is unmatched.

Second, no matter how large or small your business, we have a wholesale program that will fit your needs. We have some customers that only place one order every month or two, all the way up to customers who place large orders on a daily basis. The performance auto industry is very diverse, and we are more than willing to accommodate your needs.

Some of the other benefits you will also enjoy as a New Level Motorsports wholesale customer:

SAME DAY SHIPPING: All orders for in stock merchandise received by 8:00PM Eastern will ship the same day. In a hurry? If you order a part this afternoon, we can have it in your hand the next morning with our overnight service if needed!

NO FEE DROP SHIPPING: If you carry an open terms account with us, you'll enjoy full access to our drop shipping program with no drop ship fees.

EXTENSIVE STOCK: As a New Level customer you'll quickly learn that we have some of the highest fill rates in the industry! We are factory direct with each manufacturer that we represent, resulting in newer stock and fewer backorders.

EXTENSIVE PRODUCT KNOWLEDGE: We are familiar with every product that we carry. We can offer everything from technical support, to specifications, to recommending which parts to stock in your shop.

FLEXIBLE PAYMENT OPTIONS: We offer net terms to our customers who are creditworthy and fill out a credit application. We also offer COD service and accept all major credit cards if net terms are not available or appropriate for your business.

Getting started will only take a few minutes of your time. Give us a chance to help you grow your business by calling us toll free at (866) 639-5385. You'll quickly learn why New Level Motorsports is the premier wholesale source for performance automotive parts and accessories!

We must have a valid business license on file before we can ship any products at wholesale prices. We must also have a California resale card on file for California based businesses who wish to be exempt from state sales tax.

Download the resources you need at the New Level Motorsports Wholesale Customer Service Center.

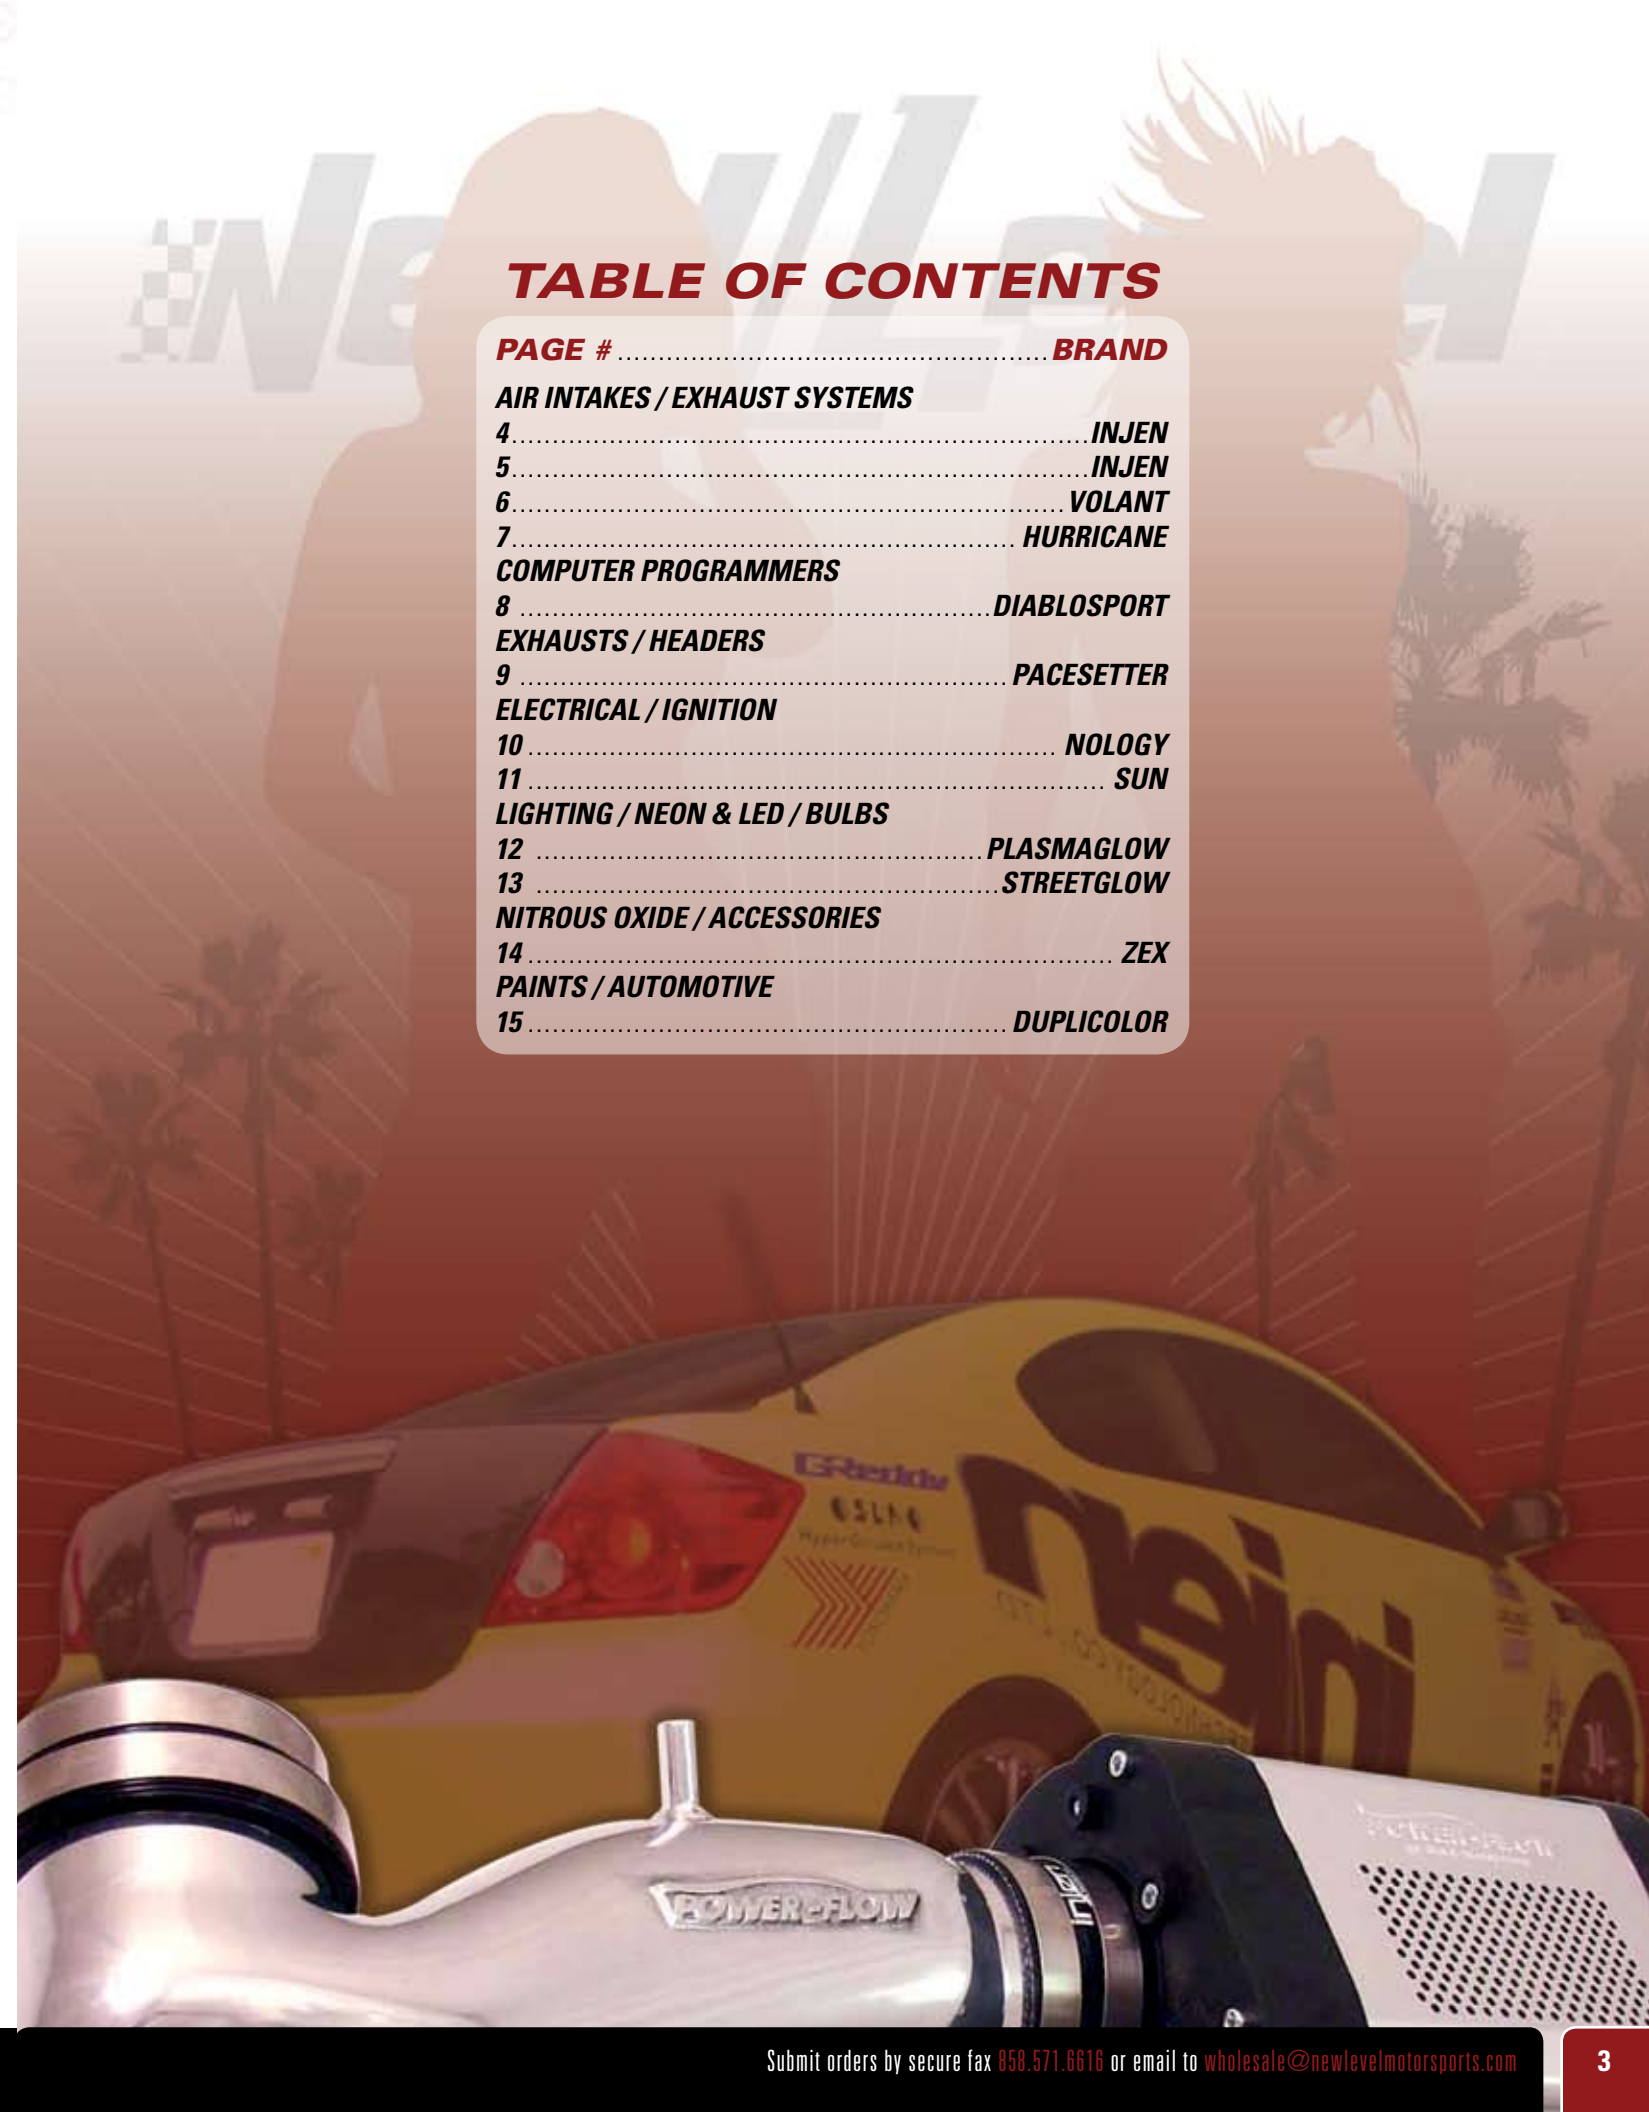

- Download current application and price guides
- Keep up to date on current specials.
- Download logos, product instructions and more!

INJEN

injen
TECHNOLOGY

An Injen air intake is the perfect upgrade to your vehicle. After removing your factory airbox, the intake tube is directed directly behind the front bumper to acquire colder, direct air. Although most Injen intakes are a one piece design, several are a two piece design due to the mass air flow meters on some vehicles. You wont ever have a check engine light or have to trick or unplug a sensor with an Injen intake! Every RD system is certified or pending by the California Air Resource Board and is backed by Injen's lifetime warranty.

What Makes Injen Intakes better than their competition? Not only are all Injen Technology Intakes **MADE IN THE USA**, Injen cool air intake systems feature MR Technology, developed by Injen to maintain safe air/fuel ratio and highly efficient tuning. Injen also does extensive dyno tuning and r&d before releasing an intake , unlike many other companies who take an "if it fits, use it" attitude to aftermarket intakes.

Injen Technology's **SUPER SES** line of exhaust systems are dyno-tuned to compliment our performance intake systems; in doing so, the Super SES provides maximum horsepower and torque across the power band. The Super SES exhaust system is manufactured from 100% 304 stainless steel. Each exhaust system features CNC mandrel-bent stainless steel tubing, CNC machined flanges, and robotic TIG welding.

INJEN

injen
TECHNOLOGY

THE INJEN POWERFLOW AIR INTAKE is engineered to perfection for reliability, efficiency, and maximum power. All Truck applications are designed with Injen's patent pending MR Technology Tuning Process for maximum gains and a safe air/fuel ratio. One feature that makes the Power-Flow series stand out can be seen in the development of the Power Box. Much more than just an air intake system, the units feature an air stabilizer, velocity stack, and an Air Inducer, all encapsulated within the Injen Power Box, which also acts as a heat shield.

THE ALL NEW INJEN POWERFLOW DIESEL AIR INTAKE is light years ahead of the competition and will provide superior horsepower and torque gains for your diesel truck!

FEATURES INCLUDE:

Variable induction (Vi) Technology: Provides an additional airflow and power on demand, based upon the engine's draw. There are four internal and independent valves designed to open and allow more air for crucial moments when extra power is required: passing, towing, climbing hills, or track and off-road racing.
 Nano-Fiber custom desigined air filter: blocks out the finer dirt and dust particles up to 99.53-percent efficiency. For diesel engines, the Ea filter removes five times more dust than traditional paper filter media and 50 times more dust than a wet gauze filter
 Stainless steel pre-filters: deflect the larger dirt particles commonly associated with immediate loss of airflow and power.

VOLANT

Not all intake systems are the same and savvy customers know which ones make more power than others. This is why Volant Cool Air Intakes are extremely popular with customers who know intake systems. What's the difference? Volant Cool Air Intakes take a different approach to making power. Volant seals conical, high-flow air filter in a box that has more air volume than factory units. This process also eliminates any chance of hot air from contaminating the intake charge to the engine.

The Volant Exhaust Systems are manufactured from mandrel bent, T304 stainless steel and are precision TIG welded and include a double wall tip. Furthermore, all of our exhaust systems are fully polished, from end to end, making it a show piece. We also designed the system to be easily and quickly installed at home or by a professional mechanic, saving the consumer time and money.

NEVER BUY ANOTHER AIR FILTER AGAIN... NEVER CLEAN OR OIL YOUR FILTER AGAIN! The **NEW** Powercore filter by Volant is designed to go long and strong, 4 years or 100,000 miles! This DRY filter uses advanced NanoFiber™ technology, featuring 99.99% filtration. Three times more efficient than conventional filters, it even holds up to OEM standards!

HURRICANE

HURRICANE DESIGNS AIR INTAKE SYSTEMS FOR THE COST AWARE CONSUMER.

At Hurricane, they are dedicated to manufacturing quality air intake systems at a competitive price. With an extensive line of Air Intake Systems, Cold Air Intake Systems, Truck Intake Systems, and Stock Replacement filters, they have a performance solution for most vehicles at a very low price.

Only Hurricane Filters feature exclusive HyperFlow filter Technology to improve the performance of your vehicle.

AIR INTAKES / EXHAUST SYSTEMS

AIR INTAKES / EXHAUST SYSTEMS

DIABLOSPORT**DIABLOSPORT**
GASOLINE AND DIESEL TUNING SYSTEMS**WHAT IS THE DIABLOSPORT PREDATOR?**

The Predator is a state-of-the art, high performance tuning flash programmer in a sleek handheld design. Once connected to the vehicle, the Predators internal computer recognizes the vehicles PCM and automatically picks the proper tuning files designed specifically for that PCM. Inside the Predator's memory are the actual tuning files that optimize spark timing and air/fuel ratio curves. You will be able to instantly program to compensate for tire size and gearing changes in many vehicles, optimize for a specific grade of fuel (87 89 91 93 etc), change your idle rpm and spark advance.

For those who want a quick and easy program, Diablosport has preprogrammed tunes in their units that download to the vehicle in under a minute. For the advanced user, the Predator also features live data logging and monitoring, and accepts custom tunes and parameters. You'll enjoy instant hp and torque gains of 20-35+ at the wheels in most of our gas applications, and in our diesel applications, you can see gains of well over 100hp and 200tq!The predator also automatically downloads and saves your factory programming so you can put it back should you ever want to.

PACESETTER**pace setter**
performance products**PACESETTER MONZA EXHAUST SYSTEMS**

The exhaust flow of an engine has a direct effect on its performance. MONZA Performance Exhausts utilize the right combination of larger than-stock, 16-gauge, mandrel-bent tubing and low back-pressure, high-flow performance mufflers for cooler, smoother engine operation and increased performance. Each system uses corrosion-resistant aluminized steel and features chrome-plated MONZA Exhaust Tips with Resonators. Comes with all hardware and instructions. Designed to replace the original equipment muffler system and, in many cases, attach to the stock catalytic converter.

PACESETTER PERFORMANCE HEADERS

The exhaust flow of an engine has a direct effect on its performance. MONZA Performance Exhausts utilize the right combination of larger than-stock, 16-gauge, mandrel-bent tubing and low back-pressure, high-flow performance mufflers for cooler, smoother engine operation and increased performance. Each system uses corrosion-resistant aluminized steel and features chrome-plated MONZA Exhaust Tips with Resonators. Comes with all hardware and instructions. NOLOGY

NOLOGY

NOLOGY HOTWIRES are the most technologically advanced ignition wires available. HotWires create the most powerful spark possible. You will experience a more complete spark with Nology spark plug wires, resulting in increased horsepower. The increased fuel economy alone, due to the increased combustion, will pay for the wires! Hotwires are engineered with a special patented built-in capacitor and ground. Why is Nology the only company producing these? They hold US and International Patents on the design and technology.

This revolutionary design allows energy from the ignition coil to accumulate in the capacitor until the voltage at the spark plug electrodes reaches the ionization point. At that split second point the entire power of the stored spark is discharged at once, creating a spark 300 times more powerful. The result is faster, more complete combustion, and most importantly, **MORE HORSEPOWER** that's 100% Smog Legal in all 50 states! Furthermore, Nology HotWires are an easy way to customize the look of your engine bay, coming in Red Black Blue Orange Yellow Purple and Silver.

What's in it for you? Easier Engine Start, Smoother Idle, Increased fuel economy, Increased acceleration, 2-5% increased horsepower, increased torque, higher rpm limits, and lower exhaust temperature and emissions! These wires pay for themselves!

SUN AUTO

SUN AUTO

The **HYPER GROUND SYSTEM** is designed to give your car a better ground to pull out the maximum performance of your vehicle, by providing a safe and reliable ultra-low resistance ground path. With this system, you can get more horsepower, more torque, better gas mileage, crisper throttle response, better starting ability, brighter lights, and better performance from your car audio system! The cables used in this system are unlike anything else on the market! They come in an array of colors to accent your engine bay to give you both performance and style.

The Hyper Ground System wires have 10 times less impedance compared to factory ground systems, and are designed to provide immaculate conduction to prevent electrical power loss. Higher resistance from factory ground cables affects the ignition system, your aftermarket sound system, and the other electrical system components, obstructing the performance of your vehicle.

The Hyper Ground System has been tested time and time again, delivering consistent results for any vehicle, whether it is completely stock or highly modified. It comes in different universal sizes, made to fit any vehicle, whether it is an import, domestic, SUV, Car, or Truck.!!

The **HYPER VOLTAGE SYSTEM** is designed to stabilize the flow of voltage from the battery. Demand from your vehicles electrical components, such as lights, stereo, gauges, even heavy throttle can cause voltage fluctuations. The Hyper Voltage system helps significantly to reduce the load on the battery by storing energy and releasing it back to the battery as needed to stabilize voltage. The end result is a more efficiently operating electrical system, which can pull out the full potential of your vehicle. When used along with the Hyper Ground System, both the flow of electrons through the ground circuit and the supply of electricity from the battery are tuned for maximum efficiency.

There are 3 types available to be most compatible with your driving style. The HR Type maximizes horsepower, the LR type maximizes torque, and the MR type combines the benefits of the HR and LR kit for maximum overall performance.

What do you get from this system? Better horsepower, increased torque, better gas mileage, improved throttle response, quicker engine starts, brighter lights, reduced emissions, and reduced audio noise!

ZEX**ZEX**

WANT TO LEAVE YOUR COMPETITION IN THE DUST?

What makes Zex nitrous kits different? the Zex dry nitrous kit uses bottle pressure to regulate the nitrous to fuel ratio. This ensures maximum protection against engine damage.

Zex nitrous kits are designed to work on stock and mildly modified systems without any further modifications to the fuel system, etc. 55-75 horsepower can be easily added with the basic 4 & 6 cylinder kits, and 75-125 horsepower on the 8 cylinder kit. A complete "Dry" nitrous system. Everything is included for a safe, proper installation.

- **Designed to work safely on both stock and high-performance, normally aspirated engines. The ideal nitrous system for many fuel injected performance vehicles.**
- **All major components are factory pre-assembled inside the "Nitrous Management Unit". Easy, plug and play, two-hour installation.**
- **ZEX Nitrous Systems have an advanced, patented feature called "Active Fuel Control". This feature monitors nitrous bottle pressure and adds or subtracts enrichment fuel. The engine never runs too rich or too lean when engaging the nitrous system.**
- **ZEX "Dry" nitrous systems activate at wide-open throttle, using advanced electronics that monitor your engine's throttle position sensor. This makes using your nitrous system very easy and reliable.**

Zex Kits fit most all sport compact cars, and many other applications. To determine whether or not Zex will work on your car, find out if your engine has a vacuum ported fuel pressure regulator. You must have one for the zex dry kit to work on your vehicle. Vehicles with a returnless fuel system have to use the Zex wet nitrous kit.

Zex Kits come with everything you need to install nitrous on your vehicle including: Nitrous management unit, 10lb bottle, nitrous nozzles (55,65, and 75hp for the 4 and 6 cyl kit and 75, 100, 125 for the 8cyl kit), arming switch, all brackets and mounting hardware, and delivery lines.

DUPLICOLOR**Dupli-Color**

Duplicolor products are unsurpassed in quality. We carry a variety of products for all aspects of automobile customization from touch up paint, to engine paint, to brake caliper paint, enamels, laquers, and more!

BRAKE CALIPER PAINT KIT: Customizing brake calipers is a whole lot easier. You can brush on color with Dupli-Color® High Performance Caliper Paint Kit. The complete kit includes everything you need to add color and style to your brake calipers. Available in five colors. Caliper Paint Kit goes on with a brush, so there's no need to remove the calipers before painting. Just mask with tape and brush on color. Everything you need is included; Caliper Cleaner, stir stick, paint brush, masking tape and complete instruction book. The Caliper Paint features Ceramic Resins for maximum heat dissipation. It won't blister, flake, crack or peel.

VINYL AND INTERIOR PLASTIC COATING: Dress up or add life to your interior vinyl and fabric with Dupli-Color® High Performance Vinyl & Fabric Coating. It's perfect for vinyl seats, dashes, door panels, shifter boots and consoles. Formulated with a maximum adhesion promoter so there's no need for primer. It's fast drying and won't crack, peel or chip. Available in a variety of OEM colors or hot tuner colors.
